

HIGH-RISE DISINFECTION MADE EASY THROUGH **STERAMIST®**

Not everything that requires disinfection is ground-level, and high rise units are just as susceptible to infection as any other location. However, SteraMist® is portable enough to fit in standard elevators and scalable enough to cover entire floors so high-rise disinfection is far from being a hassle.

Utilizing ionized Hydrogen Peroxide (iHP™) - a non-caustic, chlorine and bleach-free aerosolized fog - SteraMist® treatments can effectively disinfect a facility at any time with TOMI™ Service Network providers.

SteraMist® technology utilizes ionized Hydrogen Peroxide (iHP™), a non-caustic, chlorine and bleach-free aerosolized fog to keep you moving from floor to floor with quick and effective disinfection.

- The ultimate tool for elimination of bacteria & viruses such as **Pseudomonas, Staph, MRSA, Norovirus, H1N1, C. difficile** and **salmonella**.*
- An effective broad-spectrum surface disinfectant.
- Application time of only five seconds per square foot, with a seven-minute contact time*
